

ITE

HIGH SPEED PRECISION SHEETER

Sheeter suitable to cut:

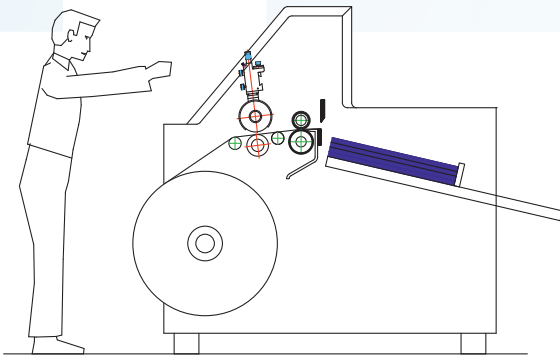

**CLOTH / SYNTHETIC LEATHER / PAPER / PVC / POLYESTER
POLYPROPYLENE / POLYCARBONATE / MATERIALS FOR STATIONERY
ELECTRONIC PREPREG / SCREEN PRINTING MEDIA**

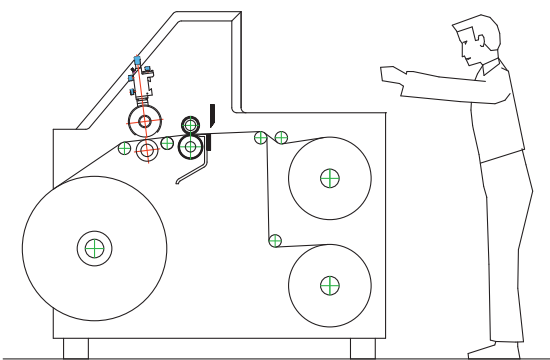

TE

HIGH SPEED PRECISION SHEETER

Unwinding of the material with NIP-rollers driven by a variable speed motor / Decurler for materials on paper base / Decurler controlled from the delivery side of the sheets / Slitting by circular shear knives / Retrieval rewind shaft for the unused width of the parent stock / Cross cutting blades have a self-sharpening scissors action; they do not require setting when changing thickness or type of material being cut / Digitally operated pre-selection of cross-cutting length / Delivery table with antistatic bar and air blower to facilitate stacking of the sheets / A wide range of options are available with this highly reliable machine: jumbo roll unwinding units, expanding air shafts, lift-in facility for the reel, self-lowering table.

Sheeting Mode

Slit-rewinding Mode

TECHNICAL SPECIFICATIONS

Working width	1500 up to 2500 mm
Length of feed range	0-9999,9 mm
Roll diameter	400 mm (max)
Roll weight	100 Kg (max)
Cutting speed	45 cuts/min
